

Assignment 1-4 – Draw Circle

Description

For this project, simply unzip the contents of this zip file into the project directory. This will automatically replace the files that you have already created. Some files will be overwritten, I recommend you to make a backup of the project of the first assignment just in case.

What to do:

Implement all the functions defined DrawCircle.h. There are two different challenges:

- **Assignment:** Implement algebraic and parametric drawing methods for circle drawing.
- **Challenge:** Implement midpoint or bresenham method for circle drawing.

Submission Guidelines

Submit only DrawCircle.cpp with a Readme.txt file as a zip folder on Moodle with the following naming conventions:

cs200fa25_{username}_2.zip

Deadline: You will have the full fall period to submit the assignment. The deadline will be the same day as the final exam.

Additional guidelines

You have available in Moodle the following files:

- "Code guidelines.pdf": a complete file detailing different aspects of the code etiquette I expect you to follow.
- "FileHeaderSample.h": example of a complete and correct header for two functions and a file.
- "README_template.txt": template of the readme file you have to include in your submission.
